

MRMA117

MediaRange 15W wireless air vent car charger, with automatic brackets, black

MediaRange inductive charging stations for car air vents are ideal for wireless charging of suitable mobile devices in your car. The smartphone is simply placed on the charging station and the charging process starts automatically after the automatic closing mechanism has enclosed your device securely and stable. The charging station is connected via a bus-powered USB port in your car or an external USB charger. This charging station supports fast charging and provides a maximum output power of 15W when used with an appropriate fast charger.

FEATURES

- inductive fast charging* station for wireless charging of Qi enabled smartphones
- touch sensor for opening and closing brackets automatically and LED indicator light.
