

MR243

CD-R 900MB|100min 48x speed, inkjet fullsurface printable, Cake 25

MediaRange CD-R storage media with additional storage capacity are great for quickly and efficiently archiving your data. The denser configuration of the helix (compression of the tracks) and maximum utilization of the disc space right up to the edge lets you archive up to 200MB more compared with regular CD-R media. The excellent recording stability allows your data to be saved in just a few minutes with writing speeds of up to 48x. The superb compatibility with CD burners and players ensures that you can access your personal photos, documents, music, videos and backups anywhere and at any time. Our entire range of storage media are known for their long archival life and excellent UV light resistance. The full-surface printable discs can be used with all inkjet printers that have a CD print function. Give your media an individual and professional design just the way you want.
